# Full Stack Web Developer

[linkedin.com/in/stevencharleshuang](https://linkedin.com/in/stevencharleshuang)  
[github.com/stevencharleshuang](https://github.com/stevencharleshuang)

Full stack web developer with a background rooted in music and E-commerce. I develop user-centric full stack web applications with the client's needs at the center of attention. Utilizing 10 years of experience developing static websites and email marketing campaigns, I have been developing full stack web applications since 2018. Passionate about client satisfaction and delivering the best products possible, I work hard to provide solutions creatively while growing from feedback and collaborating with others.

## EXPERIENCE

### General Assembly

New York, NY September 2019 – December 2019  
Cognizant Java Developer Academy Engineering Fellow

- One of twenty-two students select from a pool of over a thousand applicants for a Cognizant-sponsored program
- Created a full stack application using Java and Spring Boot on the back end that allows a user to log in, create and manage their profile, and create and manage posts and comments. Implemented API documentation using Swagger
- Developed projects with unit tests and deployed to the cloud using paired programming

### Freelance

New York, NY July 2018 – Present  
Web Developer

### IveBin

- Full stack web development for a traveler-centric blogging application using React, Node, Express, PG-Promise, JSON Web Tokens and BCrypt
- Source Version Control using Git and deployed to Heroku

### DanSchein.net

- Front end web development for a Brooklyn-based painter's portfolio website using React. Source version control using Git and deployed to Netlify

### MisterKat

- Front end web development for a travel blogger using React. Source Version Control using Git and deployed to Netlify

### General Assembly

New York, NY March 2018 – June 2018  
Web Development Immersive Engineering Fellow

- Created 4 projects during a 12-week intensive course learning JavaScript, building responsive full stack web applications using React, Node, Express and PostgreSQL with deployment to Heroku
- Conceived, planned and executed projects with self-determined daily schedules to meet hard deadlines. Project proposals required creation of scheduling, user stories, wireframes, proof of concept prototyping and priority matrices

### Layla Girl Ltd., LaylasPetStore.com

Staten Island, NY June 2012 – March 2018  
E-Commerce Specialist

- Designed responsive static templates for E-mail marketing campaigns using HTML and CSS
- Uploaded and maintained product listings using Magento, HTML, and CSV files
