# Full Stack Web Developer

[linkedin.com/in/stevencharleshuang](https://linkedin.com/in/stevencharleshuang)  
[github.com/stevencharleshuang](https://github.com/stevencharleshuang)

Full stack web developer with a background rooted in music and E-commerce. I develop user-centric full stack web applications with the client's needs at the center of attention. Utilizing 10 years of experience developing static websites and email marketing campaigns, I have been developing user-centric full stack web applications since 2018. Passionate about client satisfaction and delivering the best possible products, I work hard to provide solutions creatively while growing from feedback and collaborating with others.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6), Java, PostgreSQL, HTML5, CSS3

**Frameworks and Libraries:** Node, Express, React, Spring, Spring Boot, Mockito, JUnit, PG-Promise, jQuery, Web Sockets, JSON Web Tokens, BCrypt, Mocha, Chai

**Operating Systems:** Windows, Mac

**Tools:** Visual Studio Code, Sublime Text, Git, GitHub, IntelliJ, Eclipse, Vim, MS Office, Adobe Photoshop, Pro Tools

## EXPERIENCE

**General Assembly, New York, NY** September 2019 – December 2019

Cognizant Java Developer Academy Engineering Fellow

- One of twenty-two students select from a pool of over a thousand applicants for a Cognizant-sponsored program
- Created a full stack application using Java and Spring on the back end that allows a user to log in, create and manage their profile, create and manage posts and comments, and get a validation email sent to them after registration
- Developed projects with unit tests and deployed to the cloud using paired programming.

**Freelance, New York, NY** July 2018 – Present

Web Developer

- **IveBin:** Full stack web development for a traveler-centric blogging application using React, Node, Express, PG-Promise, JSON Web Tokens and BCrypt. Source Version Control using Git and deployed to Heroku
- **DanSchein.net:** Front end web development for a Brooklyn-based painter's portfolio website using React. Source version control using Git and deployed to Netlify
- **MisterKat:** Front end web development for a travel blogger using React. Source Version Control using Git and deployed to Netlify

**General Assembly, New York, NY** March 2018 – June 2018

Web Development Immersive Engineering Fellow

- Created 4 projects during a 12-week intensive course learning JavaScript, building responsive full stack web applications using React, Node, Express and PostgreSQL with deployment to Heroku
- Conceived, planned and executed projects with self-determined daily schedules to meet hard deadlines. Project proposals required creation of scheduling, user stories, wireframes, proof of concept prototyping and priority matrices

**Layla Girl Ltd., LaylasPetStore.com, Staten Island, NY** June 2012 – March 2018

E-Commerce Specialist

- Designed responsive static templates for E-mail marketing campaigns using HTML and CSS
- Uploaded and maintained product listings using Magento, HTML, and CSV files
